

ON2.0 Enables All-Optical Target Network and New Business

NGON 2021 & Huawei Optical Innovation Forum 2021

📍 Online 📅 NOV 15, 9:00-11:00 (GMT+1)

Dear Mr./Ms. _____,

Huawei sincerely invites you to the 23rd NGON and the 8th Huawei Optical Innovation Forum, which will be held online from November 15 to November 19, 2021.

The NGON Forum is the world's largest commercial forum in the optical transmission field. It provides a platform for discussing industry development trends and business solutions in the optical field. All of the major equipment vendors and optical component suppliers in the WDM field will be present at the event, which has been continuously running for 22 years.

The 23rd NGON will bring together global operators, data center providers, and solution providers for a five-day deep-dive into the latest trends in the optical field. At the event, you can learn about innovative practices from leading operators and partners, in addition to the latest insights from senior analysts.

The 8th Huawei Optical Innovation Forum will also be held online on November 15. Here, we will introduce the new technologies, services, and future-oriented network evolution architecture of Optical Networking 2.0 (ON2.0). What's more, you can listen to various success stories from leading global operators and get an insight into the future of optical transmission networks. Some of the key topics to be covered include all-optical target network, high-speed transmission, all-optical autonomous driving network, and new OTN private line solution.

As the principal sponsor of the NGON event and the host of the Optical Innovation Forum, Huawei would like to cordially invite you and your team to attend both events to discuss the challenges faced by the industry, and explore corresponding solutions.

We look forward to meeting you!

Richard Jin
Huawei Optical Business Product Line

Huawei Optical Innovation Forum 2021
9:00-11:00 (GMT+1) | Nov 15, 2021

Theme : ON2.0 Enables All-Optical Target Network and New Business

Topics

- ◆ ON2.0 Strategy Sharing
- ◆ Success Stories of Tier-1 Carriers in All-Optical Target Network, including Backbone, Metro and OTN Premium Private Line
- ◆ Demonstration of New ON2.0 Solutions and Innovations
- ◆ Huawei Optical Pioneer Award

NGON Event Nov 15-19, 2021 Huawei Activities

Keynote

- ◆ 11:00-11:20 (GMT+1), Nov 15
Topic: Super C + L, Smooth Evolution from Now to Future
- ◆ 09:55-10:15 (GMT+1), Nov 16
Topic: OTN to the Edge, Lighting Up the All-Optical Metro
- ◆ 11:25-11:45 (GMT+1), Nov 17
Topic: Optical Autonomous Network

Panel Discussion

- ◆ 11:25-11:55 (GMT+1), Nov 16
Topic: The Impact of Terabyte Technologies on Future Service Creation & Delivery
