## Dear Honored Guest

## Agenda

We are pleased to announce that the 2018 Global Mobile Broadband Forum will be hosted by Huawei with our industry partners GSMA and GTI on November 19<sup>th</sup> -21<sup>st</sup> at the ExCeL Centre in London.

Now in its 9<sup>th</sup> year, this annual event gathers the industry's key decision makers, policy makers and influencers from around the world to help shape the future of Mobile Broadband (MBB). Building on the success of last year's event, the 2018 Global MBB Forum will bring together mobile network operators, vertical industry leaders and broader MBB ecosystem players. We will showcase real-world case studies, offer new perspectives on our changing industry, and share new paths to sustainable growth.

Topics currently under discussion with global partners range from the future of mobile connectivity including 5G, the Internet of Things and the latest MBB industry trends, to AI, Cloud VR/AR, connected cars, and industrial robotics, all of which will help reshape our world through a ubiquitous connected ecosystem.

We are currently confirming speakers from global operators, vertical industries, regulatory and standards organizations, industry analyst firms, chipset and device manufacturers, and many other key players in the broader ICT industry - all of whom are excited to share their thoughts and perspectives on the phenomenal growth of the MBB industry and its transformative impact on many other industries.

Given the speed at which our industries and technologies are evolving, there will be no shortage of valuable insights, experiences and solutions from some of the world's most knowledgeable experts and thought leaders. The 2018 Global Mobile Broadband Forum is shaping up to be an exciting and important event. It should not be missed!

We look forward to greeting you in London this November.

Sincerely,

Ken Hu

Deputy Chairman, Huawei
